

THERMOLUXE
DOOR SYSTEMS

Contemporary Collection

This new line of revolutionary designed doors has taken the entry door market by storm and turned out to be a true success among our customers. If you are a homeowner who follows and appreciates contemporary architectural trends, then this exclusive collection is definitely your choice.

Such entry doors were developed and designed for North American market and they are in full compliance with the industry's performance and safety requirements.

These doors are gorgeous and stunning, they have a special character which will add to the curb appeal of your house. You can now make a stylish statement and make your entrance stand out!

We created multiple 2" wide stainless steel intersections and gave the lines a slight curve.

In between the curves we added a glass insert - and the result is a breathtaking design which is guaranteed to make a bold statement.

This design is also available without glass.

Steel Door Collection

Thermoluxe offers a large collection of steel entry doors. A steel door is an excellent choice for many reasons, including both performance and budget. They are available in prefinished factory white colour which is strong and durable and does not require any additional coatings or can be custom painted to virtually any colour.

Thermoluxe custom finishes for steel doors are made with high quality industrial paint which delivers a durable and perfectly smooth and uniform surface. Steel doors are protected from moisture and rotting with a composite edge perimeter. Their frames are reinforced with a steel rail for structural stability and prevention of bowing and warping.

Steel door skins are interlocked with stiles forming a J-bend edge to ensure stability and resistance to delamination. Steel doors have HCFC free polyurethane high density foam insulation with an excellent thermal resistance, 0.076 U value or 13.1 R value, which results in five times better insulation value than a standard wood door. Steel doors up to 36" x 80" size have a 20 minute fire-rated certification.

To engineer these sophisticated and flexible doors we paired state-of-the-art machinery with quality workmanship and equipped the system with guides and pivots using high grade stainless steel bearings, smart design carriers, polypropylene floor channel lining. Support track, guide channels and sills are made from aluminum extrusions which provide excellent structural strength and stability.

TECHNOLOGY

Double glaze panels allow to achieve outstanding insulation levels against outside noise and temperature. The doors are built to fit snugly against weather seals and have passed toughest water and air infiltration tests demonstrating a superior resistance to both. For instance, their air infiltration level 50 times exceeds the one of a sliding door.

INSULATION

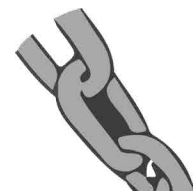

Once these doors become open, the owner can fully enjoy all the benefits of the space transformation. We have put every effort to ensure that integration of the inside and outside of your space occurs in the most smooth and flawless way to provide an easy and hassle-free operation and maximize your comfort.

SECURITY

Thermoluxe bifold doors have demonstrated highest performance ratings and excellent durability. They can be used with complete confidence since all their components were extensively tested to ensure their conformity with the toughest industry standards. This means an uncompromised and trouble-free performance which will allow you to enjoy the product for many years.

DURABILITY

Thermoluxe bifold doors will successfully protect your residence from the harshest weather, create an effective acoustic barrier and allow you to enjoy the sunlight and stunning panoramic views with easily gliding panels which neatly stack aside.

VERSATILITY

Thermoluxe bifold doors excel in both function and aesthetics, offering eye-catching design, clean lines, premium quality materials, hidden hardware and a variety of luxury finishes. Whether you want to create an entertainment area, enjoy a shoreline panorama, or just visually expand the space, Thermoluxe bifold doors will be a perfect solution bringing an incredible quality style to your living.

INSULATION

Once these doors become open, the owner can fully enjoy all the benefits of the space transformation. We have put every effort to ensure that integration of the inside and outside of your space occurs in the most smooth and flawless way to provide an easy and hassle-free operation and maximize your comfort.

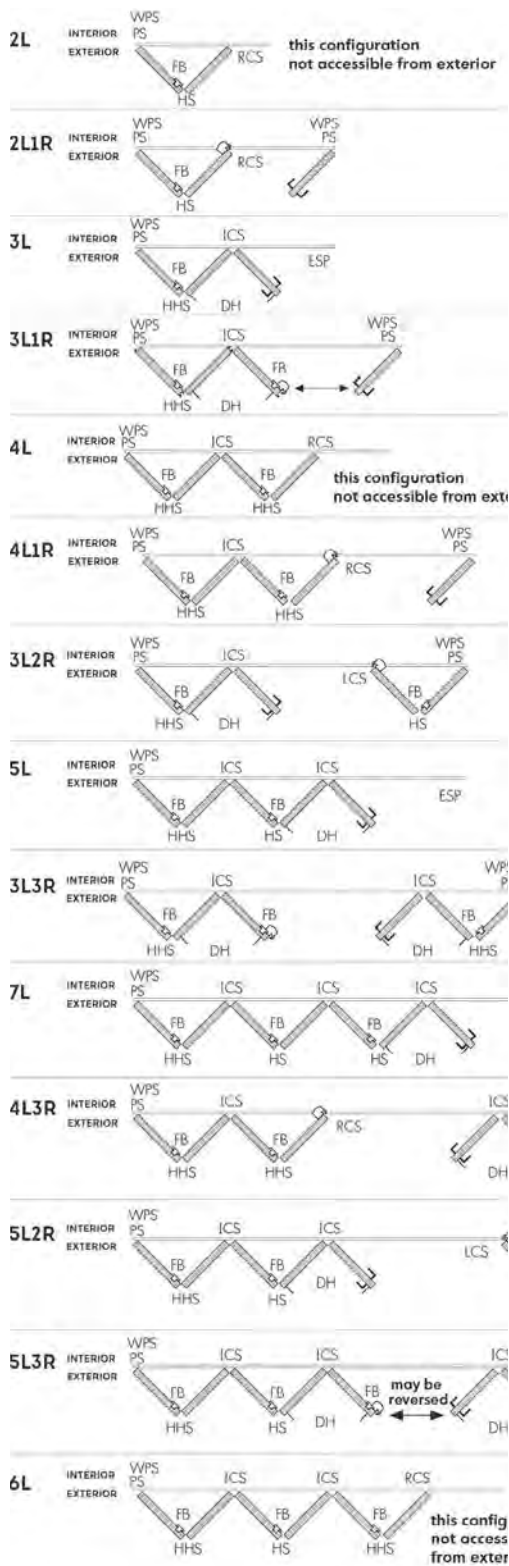

COMFORT

Thermoluxe offers revolutionary bifold door technology and customization which will allow you to create a spectacular and amazing setting in your house and match it beautifully with the rest of your home architecture.

UNIQUENESS

Hardware Legend

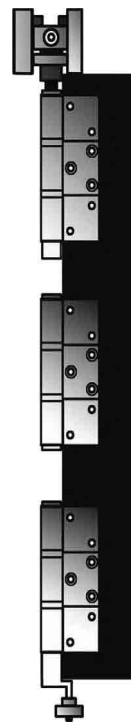

PS	Pivot set	HS	Hinge set (flat)
WPS	Wall pivot set	FB	Flushbolt
ICS	Intermediate carrier set	ESP	Extended strike plate
LCS	Left carrier set	DH	Door hold
RCS	Right carrier set	MAG	Magnet

FOLDING PANELS

Thermoluxe bilold door systems can include up to 16 top track mounted panels with up to 8 panels sliding sideways each direction from the centre and arranging into a compact fold. Maximum panel height is 95", maximum panel weight is 100kg.

COMPONENTS & HARDWARE

Support track, guide channels and sill of our folding doors are made from aluminum extrusions which are structurally very strong. Operating hardware is available in high quality brass or stainless steel materials and when doors are closed such hardware becomes concealed and not accessible from outside.

EASE OF OPERATION

Stainless steel bearings in the pivots and carriers allow even the largest doors to be moved quietly and with fingertip ease between the open and closed position.

Garden Door Collection

Garden doors engineered by Thermoluxe offer everything to create a stunning entryway for your patio or balcony area. These door systems are built from steel or fiberglass to provide an excellent durability and performance.

Thermoluxe garden doors deliver an impressive energy-efficiency and are completely weatherproof so you can have peace of mind knowing that your comfort will be well protected from harsh conditions such as rain, snow, wind etc. year after year. Our garden doors are impervious to temperature fluctuations and they won't corrode, swell, crack, rot or warp saving you a lot of valuable time on maintenance.

Our garden doors offer an outstanding selection of glass options. Glass comes in 3 sizes and can be clear, with decorative grills or patterned privacy. We also provide venting inserts, ideal for creation of additional air flow in your house, as well as internal mini-blinds which stay dust free and allow you to control both light and privacy. which will allow you to control both light and privacy. With selection of various configurations, durable, peel-resistant finishes and quality hardware, our garden doors will complement your home in the best way and make a difference your family will appreciate for a lifetime!

Options & Accessories

Thermoluxe entry doors are made pre-finished. We use high grade commercial paint and stain finishes specifically designed for fiberglass and steel doors.

Painting or staining process gives the door an excellent protection from weather exposure and makes it virtually maintenance-free. Pre-stained and pre-painted doors have durable surfaces which will never neither peel nor corrode for many years ahead keeping your entrance attractive and secure.

Our paints and stains carry a 7 year warranty against discolourations and a limited lifetime warranty against adhesion failure.

Thermoluxe doors include everything you could possibly need in an entry door - durability, low maintenance, excellent security and superior performance.

SUPERIOR CRAFTSMANSHIP

MULTI-POINT

LOCKING SYSTEM

We can help you improve the level of security for your home entrance by installing our premium quality multi-point locking systems engineered with European technology. These locks meet all the highest standards for resistance to a forced entry, fire safety, tightness and accessibility.

Such lock activates automatically at the moment when you simply close your door - top and bottom 3/4" (20mm) latches get instantly engaged. If you turn the key from the outside or the knob from the inside at 90° angle, the 1" central deadbolt becomes engaged and locks the upper and lower latches making it a 3 deadbolt locking system.

Designes for your convenience, this multi-lock will not require any handle lifting to activate locking points. Your closed door will stay protected from warping since top and bottom latches are always engaged. Our automated multi-point lock system is a reliable and secure locking solution for your home entrance.
